

Agent Manager > Workspaces > Playground

Playground

Playgrounds are independent workspaces that allow you to start a conversation and explore ideas instantly, without the overhead of setting up a new workspace.

Creating a Playground

From the Start Conversation page, you can quickly send a message to a new playground by clicking the Use Playground button below the input box.

About Playground

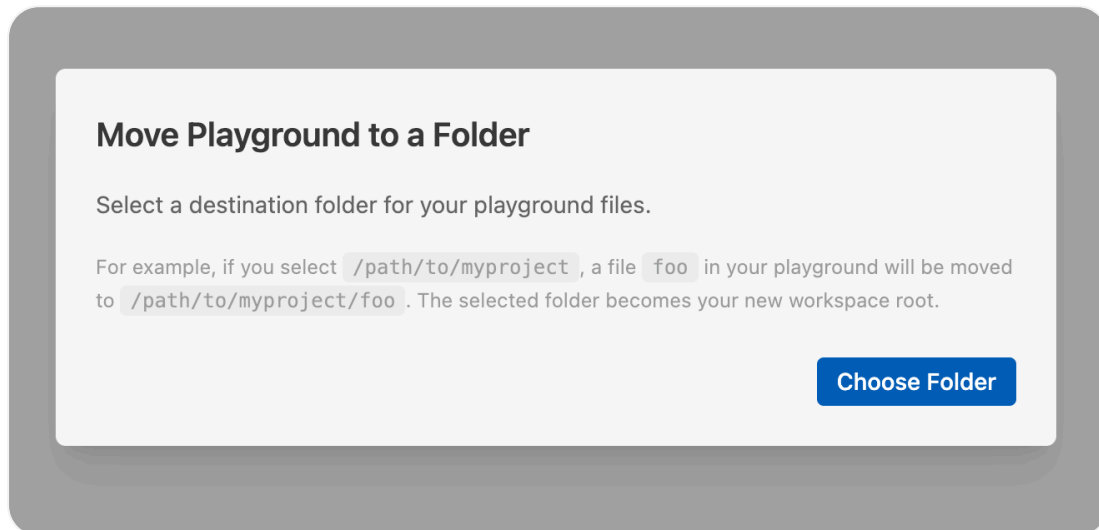

Playgrounds are independent workspaces perfect for quick prototypes or following your curiosity. Move to a dedicated workspace to continue exploring with multiple conversations.

Persisting Your Work

If you want to keep the work you've done in a playground, you can move its contents into a dedicated workspace in a folder of your choosing. This action preserves your conversation history and any files created during your session, allowing you to continue exploring with multiple conversations.

■ Agent Manager > Workspaces > Playground

Clicking on the move button in the top bar will pop up the following modal:

< Workspaces

Inbox >
